Distributor of Electronic Components

To Whom It May Concern:

Hughes-Peters is a distributor and a value-added services provider of electrical components. We do not design or manufacture any of the electrical components that we sell. We also value having long-term relationships with our customers and have assisted customers with regulatory questions. The Restriction of Hazardous Substances Directive (RoHS) and the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) are two important legislations affecting commerce in the European Union. Hughes-Peters complies with these legislations by informing our valued customers of information available to us. Since Hughes-Peters does not have the authority to make statements about the composition of components and does not perform any chemical testing, we rely completely on manufacturers to provide all RoHS and REACH information.

The Management of Hughes-Peters
